How to generate API Key with Mailvio

Please use the steps below to generate an API Key for 3rd-party apps you'd like to integrate with Mailvio. You can generate this on your account by doing the following:

1. Go to Company Profile on the top right-hand side
2. Go to the API Keys Tab
3. Click on Create API Key, add the name of the key then proceed
4. Once successful, always check Enabled and Write Enabled to ensure that the key is working as expected
