Mailvio Integration With Pabbly

This article will teach you how to integrate Pabbly with Mailvio to activate a workflow. Together with Pabbly, this will allow you to create complicated automations more easily and quickly without having to go through a difficult manual process.

To begin the process of integrating Pabbly with Mailvio, you need to have an account in Pabbly as well as Mailvio that will be used to make this integration possible.

Step 1: You will be sent to the following page.: https://connect.pabbly.com/dashboard

Note: You can directly visit once logged in and skip step number 8

Step 2: Find a settings icon on the left side of your screen

Step 3: Click on Connection

Step 4: Click on Add Connections

Step 5: Search for Mailvio and select it.

Step 7: Name your connection and click on Connect with Mailvio.

Step 8: Log in to your Mailvio account and voila, integration is done!

Now it is time for you to learn how to use Mailvio with Pabbly for creating different types of workflows. To ensure that you learn effectively, make sure to watch this video carefully, where we will guide you on how to do that.
