Mailvio integration with Poptin

What Poptin do?

Built for digital agencies, online marketers, bloggers, portals, and eCommerce website owners seeking to Increase visitors' engagement, get more email subscribers and, capture more leads and sales.

Before Getting Started
Prior to integrating Mailvio with Poptin, you need an active Poptin account.

Integrating Mailvio with Poptin

Step 1: First, you'll need to grab some info from your Mailvio account. You'll need the group ID number for the group you want to add subscribers to, and you'll need your API key.
To get the group ID head to the Group page, and select the group you want. The ID will be in the URL or at the right side of the page:

To get the API key, head to the API keys page in the Integration section of your account.

Step 2: Log in to your Poptin account and go to the popups dashboard. Once there, click on the pencil icon next to the popup which you want to integrate with Mailvio, and click Edit Design.

Step 3: Scroll down to Email and Integration and click on Add Integration.

Step 4: Find Mailvio in the Integration List and click it.

Step 5: Paste your recently copied API Key and Group ID in your Add Integration prompt on Poptin.

Once the authentication is done successfully, click on the Approve button at the bottom to save the integration.
