

Mailvio Integrations

How to generate API Key with Mailvio

Please use the steps below to generate an API Key for 3rd-party apps you'd like to integrate with [Mailvio](#). You can generate this on your account by doing the following:

1. Go to Company Profile on the top right-hand side
2. Go to the API Keys Tab
3. Click on ☐ Create API Key, add the name of the key then proceed
4. Once successful, always check Enabled and Write Enabled to ensure that the key is working as expected
