

Mailvio Integrations

Mailvio integration with Integrately

Step 1: First thing, you need to have an Integrately account and login into your account.

Step 2: Once you login, you must choose Mailvio to connect.

Step 3: For the App 2, you can just select any app you want to connect with.

Step 4: After selecting an app, scroll down and click on that automation and a notification box will pop up and just click on that Check It Now button.

Step 5: From there, you will be routed to a page for connection. Click on Select Connection and if you don't have a connection yet, click the Add Connection button.

Step 6: Click on Continue and it will be routed to your Mailvio account.

Step 7: Once done, you'll see your integration and just click Continue.

Step 8: Fill all the fields that you have and you're good to go.
